

WATER SYSTEM

The Stand Alone WATER TREATMENT PLANT kit can purify water, both from wellheads and rainwater, making it drinkable and can then go on to service a number of habitations.

- 1 SOLAR PANELS AND/OR WIND TURBINES
- 2 NRG BOX STORAGE SYSTEM
- 3 WATER PURIFYING SYSTEM
- 4 OZONISATION SYSTEM (OPTIONAL)

APPLICATIONS

WATER TREATMENT

Thanks to NRG Box Care System the precious energy coming from the sun and/or wind, is used to transform and ensure drinking water quality in areas where this need is not yet a right.

OZONISATION

By using the Water Treatment kit's ozonisation system, it is possible to get purified, sterile water that can be used for disinfection and healthcare.

CREATION OF THE STAND ALONE WATER TREATMENT PLANT KIT

Above, the Stand Alone Water Treatment Plant Kit, produced in Padua with the sponsorship of the Veneto Region POR (Veneto Region Operational Programme) taking advantage of the "European Regional Development Fund" financing.
